

Any Build Step Plugin

Plugin Information

View Any Build Step [on the plugin site](#) for more information.

[Features](#)
[Change log](#)

Features

- Use publishers as a Build Step (via the [Conditional BuildStep Plugin](#))
- Use builders during the Post-build Actions (via the [Flexible Publish Plugin](#))
- Adds a global configuration option for the Flexible Publish and Conditional BuildStep Plugins to enable all build steps to be made available to them.

Change log

0.1 (14/11/2011)

- Initial release
