

Extended Read Permission Plugin

Plugin Information

View Extended Read Permission [on the plugin site](#) for more information.

This plugin enables the Extended Read permission in Hudson 1.324 and newer.

When this plugin is installed and active, a new column will be added to your authorization strategy configuration (for example, Matrix Security or Project-Based Matrix Security) in the Configure Security screen.

This permission grants users and groups read access to pages that would otherwise require configuration or administrative permissions.

The pages that currently support this permission are:

- Job configurations

CHANGELOG

2.0 Upgrade to 1.609.1 minimum baseline

Refresh of the plugin. Should not have any impact as the code has not been touched.

Noticeable advantage: now the plugin does not pull cvs as a dependency.
