

Started-By Environment Variable Plugin

Plugin Information

View Started-By Environment Variable [on the plugin site](#) for more information.

This plugin makes the user id that started a build available as *environment variable*.

ATTENTION:

This Plugin has/had problems with Jenkins versions ≥ 1.442 (or *somesuch*) : [JENKINS-12074](#)

There is another (newer) plugin available that allegedly should do "the same" thing: [Build User Vars Plugin](#)

```
JENKINS_STARTED_BY
```

This is the same information that Jenkins normally displays in the Console Output on the first line

```
Started by user ...
```
