

# Node Offline Notification Plugin

## Deprecated

This plugin has been deprecated. Please use the [Mail Watcher Plugin](#)

Get a notification by email if one of your nodes suddenly goes offline

## Features

- Node specific email notification if a node suddenly goes offline
- When master is restarted, a notification will be sent to all configured nodes, making everyone aware of this. (If you don't receive an online message, the node is probably still offline)
- Online messages for a node that previously went offline
- Environment variables stored on the master possible as input in the email address field

## Version History

### **v1.0.3 (2012.04.01)**

Email array wasn't cleared between calls to online if the next node wasn't configured.

### **v1.0.2 (2012.03.31)**

Bug fix, accidentally calling `getTarget()` on the wrong object.

### **v1.0.1 (2012.03.29)**

Fix for a bug in included gem

### **v1.0 (2012.03.28)**

Initial release
